

AXIELL APERIO

EVERY MOMENT IN A
LIBRARY IS PRECIOUS.
CREATE MORE MOMENTS.

Solution overview

Extend opening hours, improve the library service to your community and drive efficiency. With Axiell Aperio, every library is open.

Axiell Aperio is a platform for libraries, it helps you extend opening hours, automate, monitor and control the entire library, and grow the library service in an efficient way - generating value for your library and patrons. The Axiell Aperio platform enables you to integrate a range of systems and devices for a fully automated library experience for your patrons; one that lets them access the library outside of normal hours.

Efficiency

Increase value for the library service and its patrons.

Community

Greater focus on the needs of the community.

Flexibility

Opening hours as your patrons want them.

AXIELL APERIO

HOW DOES IT WORK?

Axiell's experts will integrate both self-service and security components, so that they can be managed via the Aperio platform. The Aperio difference is that all this can be managed through the cloud.

Connecting to the cloud means you can manage, monitor and control your library - or a number of libraries - remotely from any device connected to the Internet. Manage opening hours, monitor safety cameras, or track library usage trends online.

Aperio is an open platform that lets you build an intelligent and autonomous solution to suit the needs of your library and patrons. Choose from a range of options and devices or integrate existing infrastructure to take advantage of Aperio with minimal disruption.

Engage your community with a more relevant, accessible library service.

Manage your library with an intelligent, extensible solution that allows you to monitor and control every element of your branch.

Plan for the future and build on a platform built for growth.

A complete self-service solution for longer opening hours.

Access control

Using an access code and library card, patrons can access the library outside normal hours.

Administration

A simple, powerful user interface that manages every aspect of the Aperio solution.

Complete integration

Elements of the Aperio solution are fully integrated with not only each other but also the Library Management System.

Audio announcements

An internal PA system with recordable voice messages can notify patrons of closing times etc.

Security and safety

Security systems and video safety cameras secure the library and reassure patrons of their safety.

Fully customisable

Set up and manage opening hours, security settings and more all through a simple interface.

Simple means better outcomes.

ABOUT AXIELL

Axiell UK is a specialist provider of library solutions that can help you better engage with your community, manage your library, and grow your service.

The Axiell Digital Library:

Engage: Arena and eHUB – combined print and electronic resource discovery.

Manage: Spark – simple intuitive cloud based staff interface for acquisitions, circulation, cash management, cataloguing and administration - any device, anywhere. RFID solutions Axiell Axess and Aperio, and a full suite of online and tailored consultancy and customer services.
